

DEIMIC Touch Panel

SPECIFICATION:

Dimensions: 91 x 74 x 19 [mm]

Screen size: 2,8 inch

Touchscreen type:
capacitive

Power supply: 12 DC

Input current: 0,5A

Data bus: CAN bus

The **DEIMIC** Touch Panel is designed to control **DEIMIC ONE** devices.

It should be connected directly to the **DEIMIC** system CAN bus to ensure direct control of output devices.

The panel can control lights, roller-blinds, controlled-sockets, heating zones, climaconvectors and recuperator.

The panel menu can have up to 5 menu pages, each page contains 9 icons.

Lookout of the **Deimic** Panel menu is configured via **DEIMIC** Cofigurator software.

The panel also includes temperature and humidity sensors, which measurements are transmitted to the **DEIMIC** system.

The **DEIMIC** system can send information messages to the panel, which are displayed on the screen.
